Introducing ScienTech Premium – Our New Program for Advanced Startups!

We're excited to launch ScienTech Premium, a new program designed for startups at more advanced stages. This exclusive track provides a comprehensive support framework, including business, regulatory, and marketing guidance, to help startups refine their strategy and successfully apply for Israel Innovation Authority grants. If you're ready to take your startup to the next level with expert mentorship and hands-on support, [click here to apply!](#)

Congratulations to a ScienTech startup on receiving the "Tnufa" grant!

One of the startups that grew within our accelerator recently received the "Tnufa" grant from the Israel Innovation Authority, a grant designed to support early-stage entrepreneurs. The grant provides funding of up to ₪200,000, covering 80% of the total submission budget, which can reach a maximum of ₪250,000. The ScienTech team and an external reviewer professionally guided the application process, as part of our ongoing support for startups. We are proud to see our ventures grow and bring their visions to life!

ScienTech Startup Challenge – Calling All University Innovators!

GOT A BIG IDEA IN TECH?
Win 500 Shekels!

Swipe left to learn how!

Are you a university student with a groundbreaking idea in science, technology, or deep tech? This is your chance to turn it into reality! ScienTech invites you to participate in the Startup Challenge, where the best ideas will win BuyMe coupons worth 500 shekels and gain exposure to our leading biotech accelerator.

How to Participate?

Develop a unique startup idea in science or technology.

Submit a one-pager detailing your idea, its impact, and target audience.

Compete for a chance to win and take your first step into the world of entrepreneurship. 

Open to all university students – share this with your network!  Submission Deadline: March 7  Learn more & apply: [Here >>](#)

Inspiration:

We would like to recommend a fascinating podcast:

Dr. Shirley Berman completed her PhD at Ben-Gurion University, where she researched the use of plant-based oils for energy purposes. During her postdoctoral studies at the Technion, she shifted her focus to cannabis oil extraction as part of cancer drug research. Today, she applies all this expertise to her current research at the Weizmann Institute. Tune in to this fascinating podcast episode to explore her journey and groundbreaking work!

Digital Transformation Insights from Novant Health

Novant Health, a leading U.S. healthcare system, is leveraging AI, cybersecurity, and enterprise-wide digital solutions to enhance patient care. In a recent interview, Onyeka Nchege, EVP and Chief Digital & Information Officer, shared key lessons on successfully implementing healthcare technology at scale. His approach emphasizes trust, education, and seamless integration—valuable insights for Israeli health tech and biotech innovators looking to drive real-world impact.
